

As a teacher, we use digital learning to meet Common Core State Standards, administer online assessments, and make data-driven decisions. I use digital learning my classroom to view online material that is not in the textbook. However, my school network is failing to keep us with demand, and the need for a reliable high-speed network is only going to increase in the near future. All students need access to high-speed broadband in the future. Our future depends on the students success. Help us! Fund the E-Rate program.
